

**Are you technically curious and love creating solutions? Do you enjoy working with people and want the freedom to shape your own role?**

Polytec Inc. is seeking a driven, technically minded individual to join our Technical Sales team, supporting our industry-leading Laser Surface Velocimeter (LSV) systems. In this role, you'll collaborate with top manufacturers in steel, aluminum, converting, building materials, and beyond helping them implement real-world measurement and control solutions.

We value capability over credentials. A bachelor's degree is welcome but not required. What truly matters is a strong technical mindset, a willingness to learn, and the ability to communicate effectively with customers.

#### **Your role:**

- Be the main technical and customer contact for pre- and post-sales support
- Understand application needs, demonstrate solutions, and support system installations
- Work with engineers and purchasing teams to move projects forward
- Provide remote and on-site support to ensure long-term success
- Take ownership of your area within the LSV product group and grow it

#### **What we are looking for:**

- Strong technical aptitude and curiosity to learn advanced systems
- Excellent communication and relationship-building skills
- Comfort in industrial environments, from steel mills to battery production lines
- Confidence engaging with everyone from operators to senior decision-makers
- Willingness to travel across North America, with occasional visits to our German HQ
- Experience in industrial sales or measurement/control systems is a plus

**We are seeking a dynamic and highly motivated**

## **Technical Sales Engineer**

**Plymouth MI, or the Southeast USA**

**This is a unique opportunity to grow into a trusted expert, make a tangible impact, and build lasting customer relationships in a highly specialized and rewarding field.**
