No budget –
just measure //

With PolyFlex you can rent and
lease advanced measurement
technologies – or order a
measurement service

When measurement matters — and budgets are tight //

Precise metrology. Zero investment risk.

With PolyFlex, you get tailored solutions for maximum metrology flexibility — whether through leasing, equipment rental, or measurement as a service. We provide exactly the support you need to make sustainable business decisions, without the need to invest in your own system.

PolyFlex is the smart choice if you...

- need to expand without capital expenditure.
- want financial flexibility and faster approvals (OpEx over CapEx).
- require metrology for short-term or project-based needs.
- operate with a limited budget or face uncertain forecasts.

Ideal for companies looking to quickly expand capacity, win new projects, or keep their measurement processes agile and adaptable.

When a direct investment isn't the right path, we offer flexible alternatives to help you move forward with your measurement tasks:

PolyMeasure //

Leverage our infrastructure and expertise — we perform the measurement for you.

PolyRent //

Rent the equipment you need for a defined short-term period.

PolyLease //

Lease the equipment over a defined period with a residual value option.

These models are designed to provide the right level of support and flexibility — so you can focus on achieving accurate results without delay.

Our flexible metrology solutions are ideal for //

Vibrometry

Velocimetry

Surface metrology

PolyMeasure //

On-demand measurement services

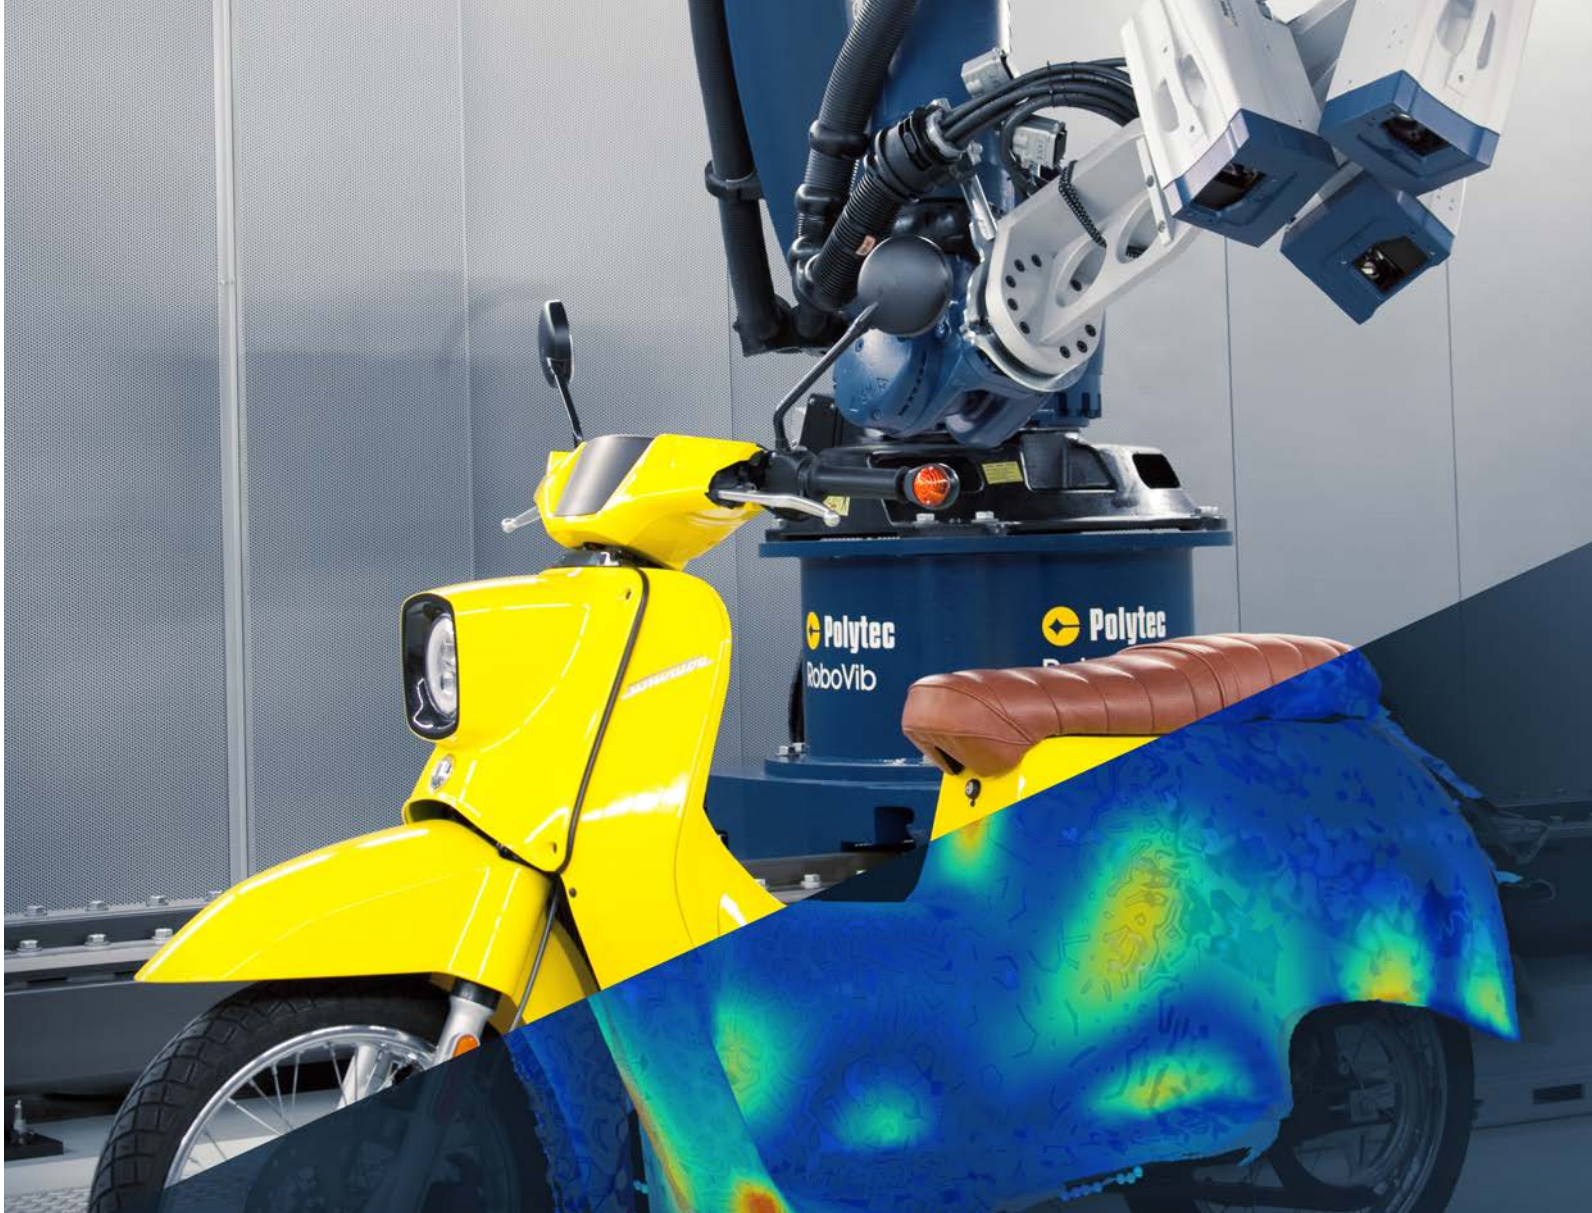

WHEN TIMING AND EXPERTISE MATTERS MOST

Sometimes the most efficient way to solve a measurement challenge is not to operate the equipment yourself — but to rely on those who know it best. With PolyMeasure, you gain direct access to our technology and expertise without needing to invest in hardware or training.

PolyMeasure at a glance

Description	Our experts perform measurements for or with you — at one of our Polytec labs or at your site.
Use case	<ul style="list-style-type: none">• Quick troubleshooting with support from experts• One-time measurement and diagnostics• FE model validation• Lack of in-house know-how and equipment• Evaluate fit of measurement solution
Benefits	<ul style="list-style-type: none">• Direct access to Polytec’s application specialists and know-how• Use of calibrated, state-of-the-art measurement equipment• No upfront investment, no training required• Fast turnaround times and professional reporting• Optional consulting for interpretation and next steps
Duration	Days to weeks

PolyMeasure // examples*

1-day Optimization sound field	2-day Aircraft turbine FEM validation
Analyze wave propagation of ultrasonic medical transducer with HeNe scanning — \$ 2,900/day	Full-field 3D scanning vibrometer to validate simulation models with high-resolution vibration data — \$ 4,750/day

* Availability and pricing of PolyMeasure depends on country

PolyRent //

Temporary access to measurement equipment

FOR SHORT-TERM NEEDS WITHOUT LONG-TERM COMMITMENTS

There are occasions when short-term access to measurement technology is all you need. With PolyRent, you can temporarily rent the equipment that matches your application — fully serviced, calibrated, and ready to go. This option gives you the flexibility to react quickly to new measurement demands without long-term obligations or capital investment.

PolyRent at a glance	
Description	Polytec equipment is at your site for dedicated timeframe — from days to months
Use case	<ul style="list-style-type: none">• For time-limited projects with clear measurement needs• Feasibility study for a purchase justification• To bridge a technology gap while evaluating a potential purchase• To avoid CapEx and work within OpEx budgets• When fast availability is essential
Benefits	<ul style="list-style-type: none">• Use of high-end equipment without purchasing it• Short-term flexibility — from days to several months• Easily adapt your metrology setup to changing demands• Risk-free trial option and rental fees can be partially credited• Fast deployment and ready-to-measure setup
Duration	Days to months

PolyRent // examples*

1-week Surface evaluation	1-week Structural vibration monitoring
Surface analysis of precision components with TopMap Micro.View — \$ 1,750/week	Rental of a VibroFlex Range system to assess vibrations in bridges — \$ 2,795/week
Rental fee can be partially credited toward a later purchase.	

* Availability and pricing of PolyRent depends on country

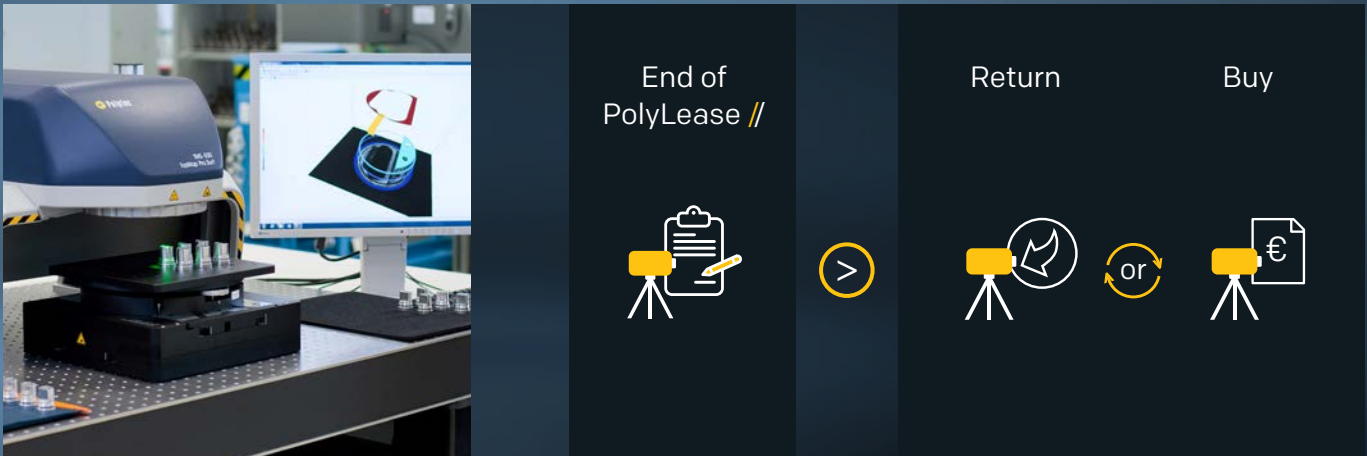

PolyLease //

Long-term technology leasing

RELIABLE ACCESS WITH PREDICTABLE COSTS

With PolyLease, you gain long-term access to advanced measurement systems without the need for an immediate capital investment. This option is ideal when you need consistent measurement capabilities, but prefer financial flexibility or want to keep open the option to return or purchase later.

PolyLease at a glance	
Description	Monthly payment with the option to return or buy at end of the term
Use case	<ul style="list-style-type: none">• For mid- to long-term use without upfront capital expenditure• Potential tax advantages• Predictable monthly costs for easy budgeting• Technology cycles or internal approval processes favor leasing• When OpEx is easier to use than CapEx
Benefits	<ul style="list-style-type: none">• Keeps your capital free for other investments• Includes maintenance for hassle-free use• Secure long-term access to cutting-edge equipment• Potential to upgrade or purchase at contract end• Onboarding, calibration and maintenance can be included

PolyLease // example*	
5-year Production monitoring	3-year Field study
leasing of IVS vibrometer for production control — \$ 495 / month (10 % residual value)	Leasing of VibroGo for long-term research — \$ 695 / month (40 % residual value)

* Availability and pricing of PolyLease depends on country

Ready for the next step //

Let's find your ideal measurement solution — with flexible models for expert services, short-term rental, or long-term leasing.

WHY POLYFLEX

- Get the most fitting solution while retaining financial and equipment flexibility
- You receive not just a product, but a complete solution
- From one-time to long-term options
- Our goal is not selling, but your measurement success

NEXT STEPS

Let's talk and find the right solution for your application. Together we determine:

- Which technology solution suits your measurement task
- What PolyFlex offering (or a combination) is the best option for your situation
- How soon we can get you up and running

No obligation, no pushing, zero risk.

About us //

Polytec has been developing innovative optical measurement technology for research and industry for over 50 years – with more than 400 employees and locations across Europe, Asia and the USA.

Our high-tech solutions in vibrometry, velocimetry, surface metrology, analytics and other optical applications are internationally recognized and valued.

Measure what matters — with full flexibility and no investment barriers.
