Controllers / Drivers and Cables

Monster BRAIN

LDM, VLDM, ALDM, RVLDM & MBC Ethernet Controller "Monster Brain Controller" : Spectrum Illumination's drivers/controllers were designed to support High Power LED's (24 VDC). vvMBC controls strobe response, continuous operation, pulse, pulse delay, intensity and duration.MBC has up to 4 strobe channels and multiple driver modules can be connected on each channel. It can be configured for 1 strobe and 3 analog (0 – 10 volts).

Units come with 2 bus connectors.

Series Highlights
- Windows 10 compatible - MBC
- Apple IOS 11 compatible - MBC
- Wireless capability - MBC
- Ethernet capability - MBC
- Embedded web server - MBC
- Programmable false trigger blocking - MBC
- DIN rail mountable with bus connections - All
- PNP/NPN strobe inputs - All
- High Speed strobe technology
- 10 Year Warranty*

Units come with 2 bus connectors.

Application Examples
- LDM - LED Driver Module
- VLDM - Variable LED Driver Module
- RVLDM - Remote Variable LED Driver Module
- ALDM - Analog LED Driver Module
- MBC - Monster Brain Controller - Ethernet & Wireless Controller for LDM, VLDM & ALDM

*10-Year warranty on registered products
*6-Year warranty on non-registered products
*3-year warranty on washdown lights
